Docket # 98N-1265 MAY 25 AM 53
Food and Drug Administration
5600 Fishers Lane
Rockville, MD. 20857

I OPPOSE THE DRAFT M.O.U. being proposed by the FDA. In particular, I OBJECT to the definition of "inordinate amount" which restricts the availability and the right to obtain medically necessary compounded medications by limiting the number of prescriptions that can be shipped across state lines from specialized compounding pharmacies.

COMMENTS: At one time, I used a commonly prescribed HRT.
I have a family history of breast cancer, and, although
never having a "suspicious" mammogram, after I began
taking these hormones, I developed cysts & unusual
mammograms. After ceasing to take that prescription and
beginning compounded natural hormones, the mammogram
technician doing my last mammogram looked for me in the
waiting room to say that she didn't know what I was
doing differently, but everything was perfectly normal.
I depend on my compound prescriptions to relieve my
menopause symptoms and protect against heart disease
and osteoporosis while not putting me in jeopardy of
developing breast cancer.
